

The Department of Biology

2017-2018

Department Chair: Jennifer Mansfield, Associate Professor, jmansfie@barnard.edu, 212-854-4381

Associate Chair: Brian Morton, Professor, bmorton@barnard.edu, 212-854-5454

Department Administrator: Jacqueline Milligan, jmilliga@barnard.edu, 212-854-2437

REQUIREMENTS FOR BIOLOGY MAJORS

These requirements apply to any student in the class of 2019 or later. The class of 2018 may choose to follow the old or the new major requirements. Please see the department webpage for a description of the old major requirements.

There are four possible ways to complete a major within Biology. A student can obtain a general Biology Major or may complete one of the three majors that concentrate on a specific level of Biological organization: Cell and Molecular Biology, Physiology and Organismal Biology, or Ecology and Evolutionary Biology.

Introductory Biology and Genetics

All students complete the 1500-level introductory sequence followed by a course in Genetics:

- BIOL BC1500x Introduction to Organismal and Evolutionary Biology
- BIOL BC1501x Introductory Lab in Organismal and Evolutionary Biology
- BIOL BC1502y Introduction to Cell and Molecular Biology
- BIOL BC1503y Introductory Lab in Cell and Molecular Biology
- BIOL BC 2100 Molecular and Mendelian Genetics

It is recommended, but not required, that Genetics be taken immediately after completing the 1500-level introductory sequence.

Upper-level Courses

Students must complete five courses from the three categories below. To complete one of the three concentrations, at least 4 courses must be from the appropriate category and at least 1 from another category. To complete the Biology Major without a concentration, the five courses must include at least one course from each of the three categories. Although some courses are listed in multiple categories, a student can only use a course towards one of the categories. Additional Columbia courses that can be used to fulfill the major requirements are provided on the biology website. If a student completes courses which make her eligible for more than one of the four majors then she may select which one is reflected on her transcript.

Courses in the Biology Major (see the last page of this packet for courses offered in Spring 2018)

Cell & Molecular Biology:

BIOL BC2278	Evolution
BIOL BC3308	Genomics and Bioinformatics
BIOL BC3310	Cell Biology
BIOL BC3320	Microbiology
BIOL BC3352	Development
BIOL BC3362	Molecular and Cellular Neuroscience
CHEM BC3282	Biochemistry I
BIOL W3034	Biotechnology
BIOL W3073	Cellular and Molecular Immunology
BIOL W3310	Virology

Physiology & Organismal Biology

BIOL BC2262	Vertebrate Biology
BIOL BC2280	Animal Behavior
BIOL BC2286	Statistics and Research Design
BIOL BC3320	Microbiology
BIOL BC3360	Physiology
BIOL BC3367	Ecophysiology
EEEB W3011	Behavioral Biology of Living Primates
EEEB W3208	Explorations in Primate Anatomy
EEEB W4112	Ichthyology
BIOL W3005	Neurobiology: Development & Systems

Ecology & Evolutionary Biology

BIOL BC2240	Plant Evolution and Diversity
BIOL BC2262	Vertebrate Biology
BIOL BC2272	Ecology
BIOL BC2278	Evolution
BIOL BC2280	Animal Behavior
BIOL BC2286	Statistics and Research Design
BIOL BC2851	Plants & Profits: The Global Power of Botany
BIOL BC3280	Applied Ecology and Evolution
BIOL BC3367	Ecophysiology
BIOL BC3388	Tropical Ecology
EEEB W3087	Conservation Biology
EEEB W4110	Coastal Estuarine Ecology

The four majors are summarized in the following Table:

Major	Course Selection
Biology	Five courses with at least one course from each of the three categories.
Cell & Molecular Biology	Four courses from the Cell & Molecular Biology category, one from another category.
Physiology & Organismal Biology	Four courses from the Physiology & Organismal Biology category, one from another category.
Ecology & Evolutionary Biology	Four courses from the Ecology & Evolutionary Biology category, one from another category.

REQUIREMENTS FOR BIOLOGY MAJORS CONTINUED

Three upper-level laboratory courses

Students may take any upper-level Biology lab courses for which they have the pre- or co-requisite. A year-long research-seminar course may substitute for lab courses, as described below. Students may also take laboratory courses at Columbia (or other institutions) to satisfy the lab requirement, with permission from the Associate Chair.

Guided Research and Seminar

Enrollment in the year-long sequence of Guided Research and Seminar (BIOL BC3591x, 3592y) fulfills two upper-level labs. This course is only available as a Fall-Spring sequence.

Senior Capstone Experience

Students complete the Senior Capstone Experience with either of the following two options:

1. One semester of Senior Seminar BIOL BC3595
2. The year-long Senior Thesis Research and Seminar (BIOL BC3592x, 3593y)

Chemistry Requirement

All majors, regardless of their track, must complete at least one semester of General Chemistry (with laboratory) and at least one semester of Organic Chemistry (with laboratory).

REQUIREMENTS FOR THE BIOLOGY MINOR

A minor in biology includes:

1. One year of introductory biology (BIOL BC1500, BC1501, BC1502, BC1503).
2. Three biology lecture courses at the 2100 level or higher.
3. Two biology laboratory courses. One of the lab courses may be replaced by two semesters of Guided Research and Seminar (BIOL BC3591x followed by BIOL BC3592y).

Please note: Chemistry, environmental science, physics, and psychology majors need to take only one advanced laboratory instead of two, but the lab may NOT be a guided research course.

ADVISING POLICY

In the biology department, students select their advisors rather than having them assigned. The student's choice must be approved and her major declaration form signed by the Associate Chair. Any biology faculty member can serve as an advisor. There are also two interdepartment majors (below).

RELATED DEPARTMENTS AND MAJORS

Environmental Biology

(Potential advisors in Biology are Callahan and Hertz)

This major is run jointly by faculty in the Departments of Biology and Environmental Science. It examines the interactions between living and non-living components of the environment, and how human activities alter these interactions. <http://envsci.barnard.edu/majors/environmental-biology>

Neuroscience and Behavior

(Potential advisors in Biology are Bauer, Glendinning and Hertz)

This major is run jointly by faculty in the Departments of Biology and Psychology. It provides a strong background in the biological underpinnings of behavior and cognition. <http://neuroscience.barnard.edu/>

RESEARCH OPPORTUNITIES

We strongly encourage students to get involved in research during the summer, academic year, or both. For many students, research is one of the most intellectually rewarding experiences at Barnard. It is also possible to receive credit for working in a laboratory at Barnard or anywhere else in New York City. You can become involved in biology research during any (or all) of your semesters at Barnard.

Three courses provide credit for research during the academic year. Before signing up for any of these courses, you should examine the associated [Checklists for Enrollment](#) located on the Biology website:

1. **Guided Research (BIOL BC3597):** This is a variable-credit one-semester course, which can be taken during any Fall or Spring semester.
2. **Guided Research & Seminar (BIOL BC3591-2):** This is a year-long course that begins in the fall. It can serve in lieu of 2 laboratory requirements for the Biology major.
3. **Senior Thesis Research (BIOL BC3593-4):** This is a year-long course, beginning in the fall the senior year. It can serve of the Senior requirement or in lieu of 2 laboratory requirements for the Biology major (but not both).

Please Note: You cannot get credit for doing research during the summer

COURSES OFFERED SPRING 2018

BIOL BC1002	Global Health and Ecology	Diana Heller	TTH 10:10am-11:25am
BIOL BC1012	Contemporary Issues in Biology Lab	Diana Heller	Various
BIOL BC1502	Introduction to Cell & Molecular Biology	Jonathan Snow	MWF 9:00am-9:50am
BIOL BC1503	Introductory Lab in Cell & Molecular Biology	Jessica Goldstein	Various
BIOL BC1513	Recitation	Jessica Goldstein	M 10:00am-10:50am & F 1:00pm-2:00pm
BIOL BC2100	Molecular and Mendelian Genetics	Jennifer Mansfield	TTH 10:10am-11:25am
BIOL BC2280	Animal Behavior	Alison Pischedda	TTH 11:40am-12:55pm
BIOL BC3360	Physiology	John Glendinning	TTH 10:10am-11:25am
BIOL BC3321	Microbiology	Stephen Sturley	TTH 11:40am-12:55pm
BIOL BC2851	Plants & Profits: The Global Power of Botany	Hilary Callahan	T 10:10am-11:25 am & TH 10:10 am-12:55pm
BIOL BC3361	Laboratory In Physiology	John Glendinning	TH 1:10pm-6:00pm
BIOL BC3363	Laboratory in Molecular & Cell Neuroscience	Elizabeth Bauer	W 1:10pm-6:00pm
BIOL BC2574	Laboratory in Human Anatomy	Chisa Hidaka	M 12:10pm-4:00 pm
BIOL BC3303	Laboratory in Molecular Biology	TBD	TH 1:10pm-6:00pm
BIOL BC3320	Laboratory in Microbiology	Stephen Sturley	W 1:10pm-6:00pm
BIOL BC2900	Research Methods Seminar	Elizabeth Bauer/ Jacob Alexander	TH 2:10pm-3:00pm
HSPP BC1001	Research Apprenticeship Seminar	Jonathan Snow	T 4:10pm-6:00pm
BIOL BC3590*	Senior Seminar in Biology	Stephen Sturley	M 4:10pm-6:00pm
BIOL BC3592*	Guided Research & Seminar	Jessica Goldstein/ Alison Pischedda	M 1:10pm-3:00pm
BIOL BC3594	Senior Thesis Seminar	Jessica Goldstein/ Alison Pischedda	M 1:10pm-3:00pm
BIOL BC3597	Guided Research	Various	

*Full Year Course
