REQUIREMENTS FOR BIOLOGY MAJORS

There are four ways to complete a major in Biology. A student can obtain a general Biology Major or may complete one of the three majors that concentrate on a specific level of biological organization: Cellular and Molecular; Physiological and Organismal; or Ecological and Evolutionary.

**Introductory Biology and Genetics**

All Biology majors must complete the 1500-level introductory sequence followed by a course in Genetics:

- BIOL BC1500 Introduction to Organismal and Evolutionary Biology
- BIOL BC1501 Introductory Lab in Organismal and Evolutionary Biology
- BIOL BC1502 Introduction to Cell and Molecular Biology
- BIOL BC1503 Introductory Lab in Cell and Molecular Biology
- BIOL BC 2100 Molecular and Mendelian Genetics

It is **recommended**, but not required, that Genetics be taken immediately after completing the 1500-level introductory sequence, as it is a pre-requisite for many upper-level lectures & laboratories. Students without a high-school biology background may begin the introductory sequence with BIOL BC1002 Global Health and Ecology and the co-requisite lab BIOL BC1012 in the fall of their first year, but for the major the entire 1500-level sequence must be completed the subsequent spring and fall.

**Five Upper-level Elective Courses**

All Biology majors must complete five upper-level courses, with category distribution requirements listed in the table on the following page, followed by courses that fulfill each category.

- To complete the Biology Major **without** a concentration, the five courses must include at least one course from each of the three categories.

- To complete one of the three concentrations, at least four courses must be from the appropriate category and at least one must be from another category.

Although some courses are listed in multiple categories, a student can only use a course towards **one** of the categories. Additional Columbia courses that can be used to fulfill the major requirements are provided on the Biology website. If a student completes courses that make her eligible for more than one of the four majors, then they may select which one is reflected on their transcript.

**Commonly Enrolled Upper-level Elective Courses in the Biology Major**

(See the end of this packet for Biology courses offered in Spring ’20)

Visit [https://biology.barnard.edu/curriculum-courses/course-listings#Columbia](https://biology.barnard.edu/curriculum-courses/course-listings#Columbia) for a comprehensive list of Columbia Courses that count toward the major.

**Cellular & Molecular Biology:**

- BIOL BC2278 Evolution
- BIOL BC2490 Coding in Biology
- BIOL BC3308 Genomics and Bioinformatics
- BIOL BC3304 Topics in Molecular Genetics
- BIOL BC3310 Cell Biology
- BIOL BC3320 Microbiology
- BIOL BC3352 Development
- BIOL BC3362 Molecular and Cellular Neuroscience
- CHEM BC3282 Biological Chemistry
- BIOL UN3034 Biotechnology
- BIOL UN3073 Cellular and Molecular Immunology
- BIOL UN3310 Virology

**Physiological & Organismal Biology:**

- BIOL BC2262 Vertebrate Biology
- BIOL BC2280 Animal Behavior
- BIOL BC2286 Statistics and Research Design
- BIOL BC3320 Microbiology
- BIOL BC3352 Development
- BIOL BC3360 Physiology
- BIOL W3005 Neurobiology II: Development & Systems
- EEEB UN3011 Behavioral Biology of Living Primates
- EEEB UN3208 Explorations in Primate Anatomy
- EEEB W4112 Ichthyology

**Ecological & Evolutionary Biology**

- BIOL BC2240 Plant Evolution and Diversity
- BIOL BC2262 Vertebrate Biology
- BIOL BC2272 Ecology
- BIOL BC2278 Evolution
- BIOL BC2280 Animal Behavior
- BIOL BC2286 Statistics and Research Design
- BIOL BC3280 Applied Ecology and Evolution
- EEEB UN3087 Conservation Biology
- EEEB W4110 Coastal and Estuarine Ecology
Three Upper-level Laboratory Courses

Students may take any upper-level Barnard Biology lab courses for which they meet the pre- or co-requisites. A year-long research-seminar course may substitute up to two lab courses, as described below. As is true for lectures, students may also take laboratory courses at Columbia (or other institutions) to satisfy the lab requirement, with permission from the Co-Chair.

- Guided Research and Seminar (BIOL BC3591 & BIOL BC3592)
  Enrollment in the year-long Guided Research and Seminar can be used to fulfill up to two upper-level labs. This course is only available as a fall to spring sequence. Seniors may not enroll in Guided Research and Seminar if they are enrolled in Seniors Thesis Research and Seminar (see below). In Guided Research and Seminar, students complete an original research project in a lab, and both write a scientific paper and give a poster presentation of their work at the Barnard Biology Symposium.

Senior Capstone Experience

All Biology majors must complete the Senior Capstone Experience with either of the following two options:

1. One semester of Senior Seminar (BIOL BC3590)
   In Senior Seminar, students participate in a seminar focusing on primary literature, and both compose and give a presentation on a senior thesis in the format of a literature review. Topics vary from semester to semester.
   
   Spring 2020: Bacteria by Design
   
   In this course, students will explore in-depth the field of synthetic biology with a focus on engineered bacteria. Topics include fundamental design principles, environmental and clinical applications, as well as ethical implications.

2. The year-long Senior Thesis Research and Seminar (BIOL BC3593 & BIOL BC3594)
   In Senior Thesis Research and Seminar, students complete an original research project in a lab, and both write a scientific paper and orally present their work at the Barnard Biology Symposium. This course is only available as a fall to spring sequence.

   Note: Seniors enrolled in Guided Research and Seminar to fulfill two upper-level labs for their major cannot take Senior Thesis Research and Seminar at the same time. Instead, they must complete their senior capstone experience with BIOL BC3590 Senior Seminar.

Chemistry Requirement

All majors, regardless of their track, must complete at least one semester of General Chemistry (with laboratory) and at least one semester of Organic Chemistry (with laboratory).
REQUIREMENTS FOR BIOLOGY MINORS

A minor in biology includes:

- One year of introductory biology (BIOL BC1500, BC1501, BC1502, BC1503).
- Three biology lecture courses at the BIOL BC2100 level or higher.
- Two biology laboratory courses. One of the lab courses may be replaced by two semesters of Guided Research and Seminar (BIOL BC3591 followed by BIOL BC3592).

*Note:* Chemistry, environmental science, physics, and psychology majors need to take only one advanced laboratory instead of two. Check with your major adviser in order to determine whether a guided research course is a suitable selection for your major’s requirements.
MAJOR ADVISING POLICY

In the biology department, students select their advisers rather than having them assigned. Students should contact prospective advisers directly. After contacting them, a student’s choice must be approved and their major declaration form signed by the Co-Chair. Any biology faculty member can serve as an adviser.

ENVIRONMENTAL BIOLOGY

(Potential advisers in the Biology Department are Profs. Callahan and Hertz)

This major is run jointly by faculty in the Departments of Biology and Environmental Science. It examines the interactions between living and non-living components of the environment, and how human activities alter these interactions. For more information, visit: envsci.barnard.edu

RESEARCH OPPORTUNITIES

We strongly encourage students to get involved in research during the summer, academic year, or both. For many students, research is one of the most intellectually rewarding experiences at Barnard. When unpaid research is conducted during the academic year, students can receive academic credit for working in a laboratory at Barnard or anywhere else in New York City. Research can be conducted during any (or all) semesters of the major, and during the summer. You may not receive credit for research that is paid.

Three courses provide credit for research during the academic year. Before signing up for any of these courses, you should examine the Checklist for Enrollment located on the Biology website:

1. **Guided Research (BIOL BC3597)**: This is a variable-credit (1-4 credits) one-semester course, which can be taken during any fall or spring semester as early as your first year.

2. **Guided Research & Seminar (BIOL BC3591-2)**: This is a year-long 4 point course that begins in the fall and can be taken starting in your sophomore year.

3. **Senior Thesis Research (BIOL BC3593-4)**: This is a year-long 4 point course, beginning in the fall of your senior year.

*Note:* You cannot get academic credit for research conducted during the summer.
### BIOLOGY MAJORS-LEVEL COURSES OFFERED SPRING 2020

*Denotes a full year course; HSPP BC1002 can only be taken in a fall to spring sequence – enrollment in HSPP BC1001 was required in fall 2019. This course is only open to first years who apply through the Dean of Studies Office.

**Limited to first-year students who received a 4 or 5 on the AP and are currently enrolled in BIOL BC1500 sequence.
Biology Department Announcements & Events

Upcoming Departmental Events

Annual Honey Extraction

Fri, Dec. 6th | 12 pm | 12th Floor Altschul

RSVP to mflores@barnard.edu by Monday, Dec. 2nd (at: tinyurl.com/y4y6pz87)

Annual Holiday Party

Fri, Dec. 13th | 12 pm | Sulzberger Parlor

RSVP to mflores@barnard.edu by Monday, Dec. 9th (at: tinyurl.com/y2u7bqx9)

Student Employment (Spring 2020)

The department is seeking teaching and/or lab assistants for the following courses:

- Introduction to Cellular & Molecular Biology
- Introductory Lab in Cellular & Molecular Biology
- Lab in Microbiology
- Lab in Molecular Biology

Listings will be available soon through BarnardWorks. Questions about introductory lab student employment can be directed to James Casey (jcasey@barnard.edu).
